## Compressible Plate Mounting Tapes

*Effective solutions* for your flexographic printing process!

Stokvis **4Flex** compressible plate mounting tapes are designed to assure top flexographic printing results and meet the most demanding individual printing needs in flexible packaging, label and corrugated cardboard industry.

### Stokvis **4Flex**, your solution for every case!

**Foam carrier:** Closed cell PE foam with film reinforcement in different grades of compressibility.

**Pressure sensitive adhesive:** High tech acrylic adhesive. Available in levels: low, medium, high, firm, extreme.

- ✓ secure bond
- ✓ immediate high tack
- ✓ clean removability
- ✓ all surfaces

**Tape thickness:** A range of different tape thicknesses with excellent consistency.

### Stokvis **4Flex**, your partner to master most challenging printing jobs!

#### A broad product range

- Broad selection of different compressibility levels.
- Wide choice of adhesion levels.
- Several tape thicknesses.

#### Top product features to meet your requirements in flexographic printing

- Unique adhesive systems for secure mounting, easy repositioning and residue-free demounting.
- Embossed PP release liner for comfortable tape handling and release of air bubbles.
- Superior printing quality and perfect control of dot gain, even at high speeds.
- Consistent ink distribution, fewer press adjustments and limited setup time.
- Elimination of banding, pinholing and other defects.
- Effective compensation of vibrations.
- Highly consistent tape thickness.
- Versatile medium hardness foam grade: for excellent print image in screen/solid and superior printing consistency over a large range of speeds and impression settings.

# STOKVIS 4FLEX

## High-Performance Range

In our continuous efforts to grant optimum quality, we have tuned the parameters. The result is our **4Flex** high-performance range. A high-performance compressible foam and a high-performance liner hold the potential to substantially improve your flexographic printing process.

### The high-performance foam optimizes your printing quality

Compressibility: additional levels of hardness extending the 4Flex range

Resilience: faster dynamic response for higher machine speeds and superior absorption against vibration issues and inhomogeneities

Durability: long-lasting properties for longer print runs

Thickness tolerance: highly precise thickness consistency

### The high-performance PP release liner saves your set-up time

Structured pattern: superior air removal

Flexible and smooth liner: easy handling and positioning

Transparency: clear and quick identification

**Consistent, premium printing quality and superior handling! At faster and longer printing runs! Plus excellent control of your process!**

## 4Flex High-Performance Range

PRODUCT	THICKNESS	FOAM HARDNESS	ADHESION LEVEL PLATE SIDE	DEFAULT APPLICATION
4Flex 134	550 µm	super-soft	medium	process printing
4Flex 334	550 µm	soft-medium	medium	combination printing
4Flex 534	550 µm	medium-hard	medium	combination/solid printing
